Key Experience

David has over 30 years in depth architectural experience in the design, documentation and commissioning of Railway Station buildings and facilities. He has hands on experience with the concept design, design development, documentation and post contractual services for over 50 railway station projects, comprising new stations or upgrading for easy access.

David's expertise in urban design and heritage, especially on rail infrastructure, extends to over 20 years the results of his work are creative and cost effective. He has a proven track record as a highly competent designer and problem solver in the railway environment. His skills have been extensively utilised to check reference designs for high profiled projects in the railway network, in addition to providing reference designs for such projects.
